Why good UX Design is smart business

and how investing in design early on will maximize your ROI

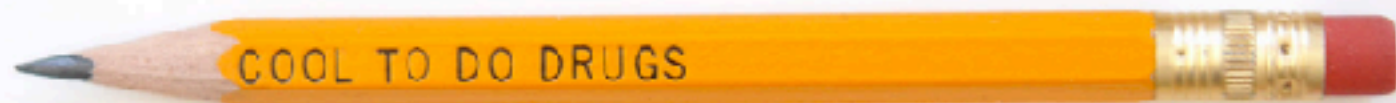

*In the 1920s, the
average lifespan
of an S&P 500
company was
67 years.*

Today it's 15 years

*Interactivism is a boutique digital **product design** studio that helps **startups** and **enterprise companies** optimize **ROI** by elevating their **user experience**.*

*Informed by **research**, and inspired by **strategy**, we
design, develop and **grow** digital **products** and **services**
that are **delightful, efficient** and **easy** to use.*

Why design?

1 HOUR

*Design is **not** just about
making things **pretty**.*

*It's about **making things**
work – faster, better, cheaper.*

What is UX design?

Product Requirements

Data

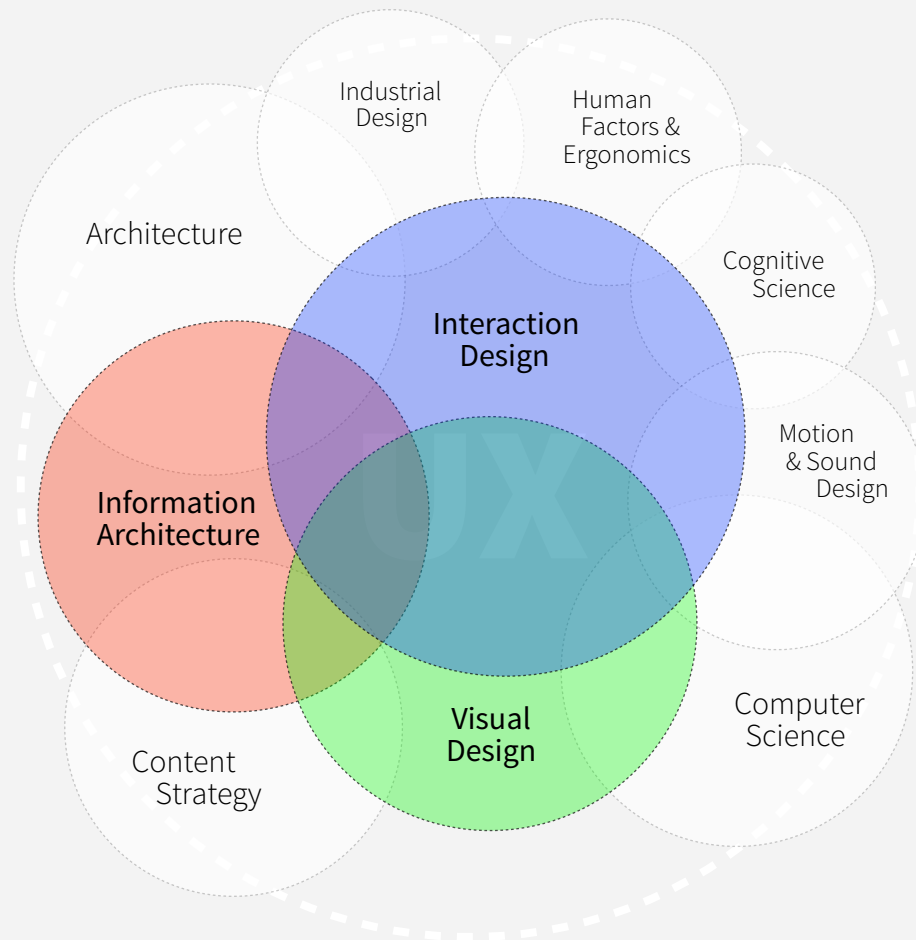

User Interface

User Experience

UX is the **sum of the experience** of using a product or service.

UX **goes beyond meeting users' needs** with an efficient and easy to use product.

UX should **strive to evoke emotions** like delight, belonging and participation.

Emotions drive loyalty

6_x

*more likely to
buy*

12_x

*more likely to
recommend*

5_x

*more likely to
forgive*

What is the ROI of UX?

H.E.A.R.T

Happiness: Satisfaction, ease of use, net promoter score

Engagement: Time on site, sessions, clicks, etc

Adoption: Share of users start using product

Retention: Share of users that keep using the product

Task Success: Time on task, task completion, error rate etc

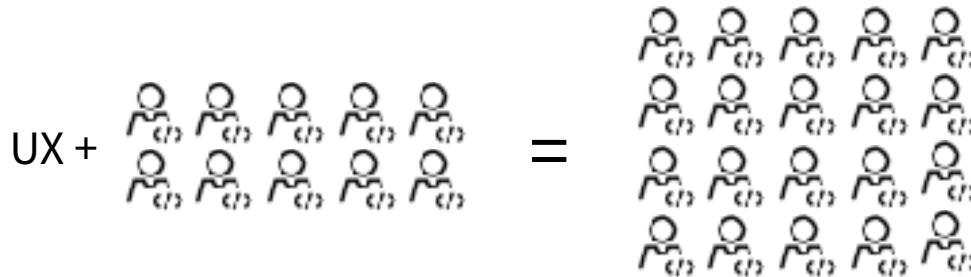

Quality	Goal	Signal	Metric
Happiness	Users to tell their friends about your product	The number of times users invite others	The avg number of invites per user per day
Engagement	Users to enjoy content and keep discovering more to engage with	The amount of time users spend engaged with your content	The avg amount of time spent on content per user per day
Adoption	New users to sign up and connect to friends	The number of friend connections made by new users	The avg number of connections made in the first user session
Retention	Users to keep using the product	The number of users that come back over time	The avg number of users that visit in two consecutive months
Task Success	Users to activate 2-factor authentication	The number of users that add an alternative contact method	The avg number of users that activate 2-factor auth per day

Direct ROI

- Conversion Rate
- Order Volume
- Average Order Value
- Cart Abandonment
- Click-Through Rate

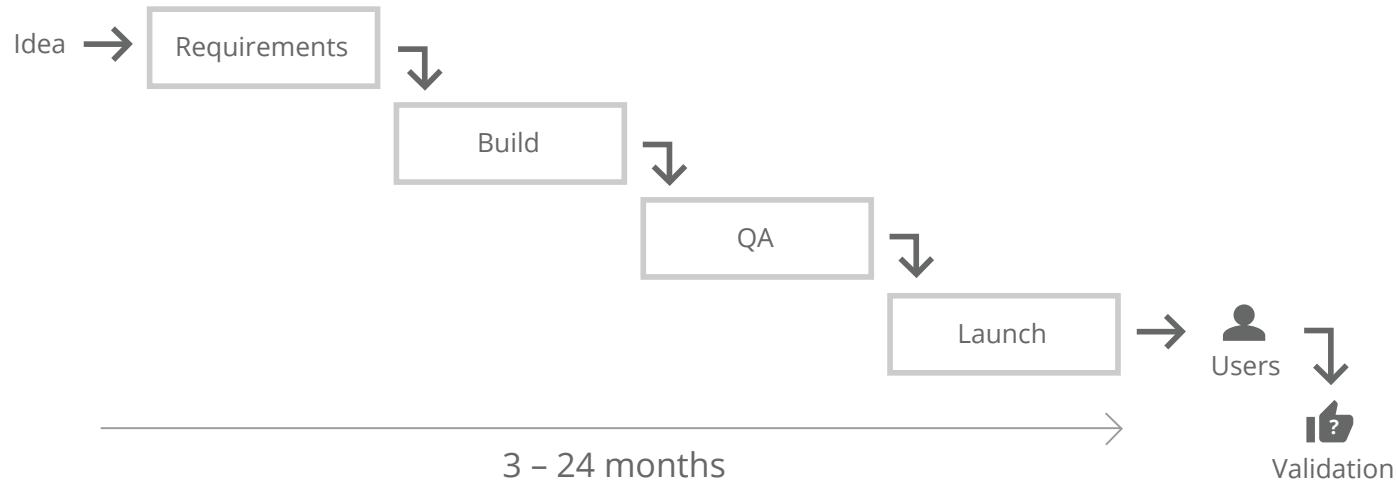

Indirect ROI

- Reduce wasted Development Time
- **Shorten overall Development Time 30-50%**
- Increase Trust and Brand Awareness
- Reduce Customer Acquisition Cost
- Reduce Support Calls

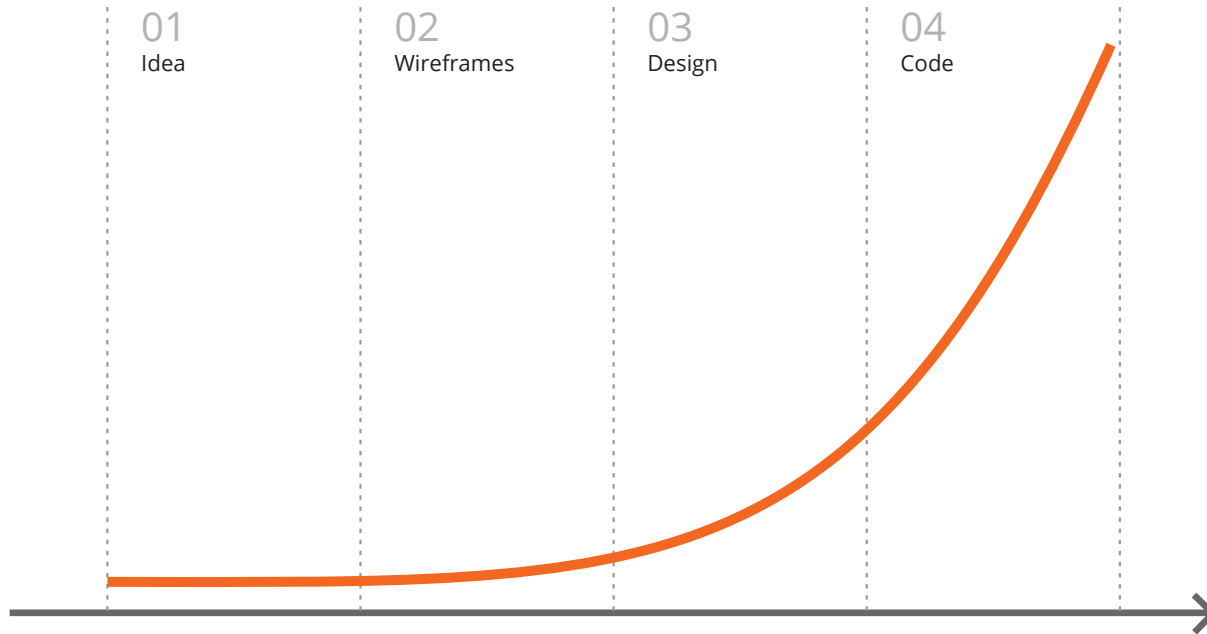

When and how do you engage UX?

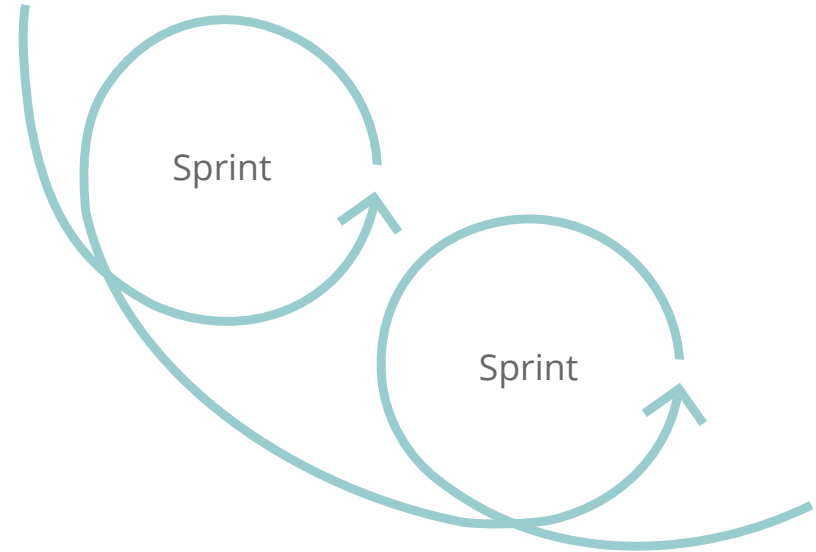

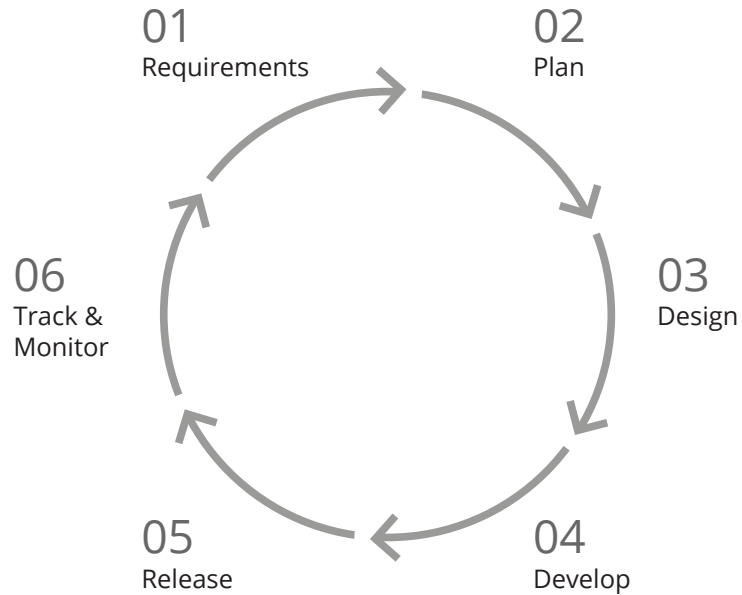

Waterfall – We're building THIS!

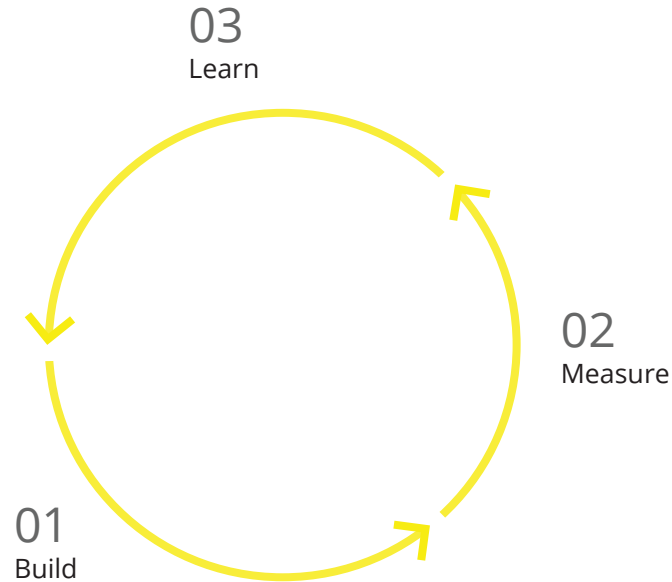

Cost of Change

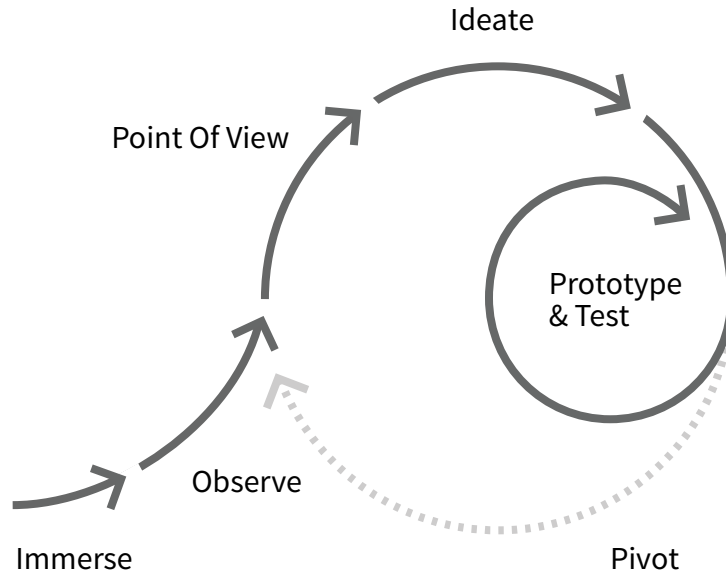

Agile: What should we build first?

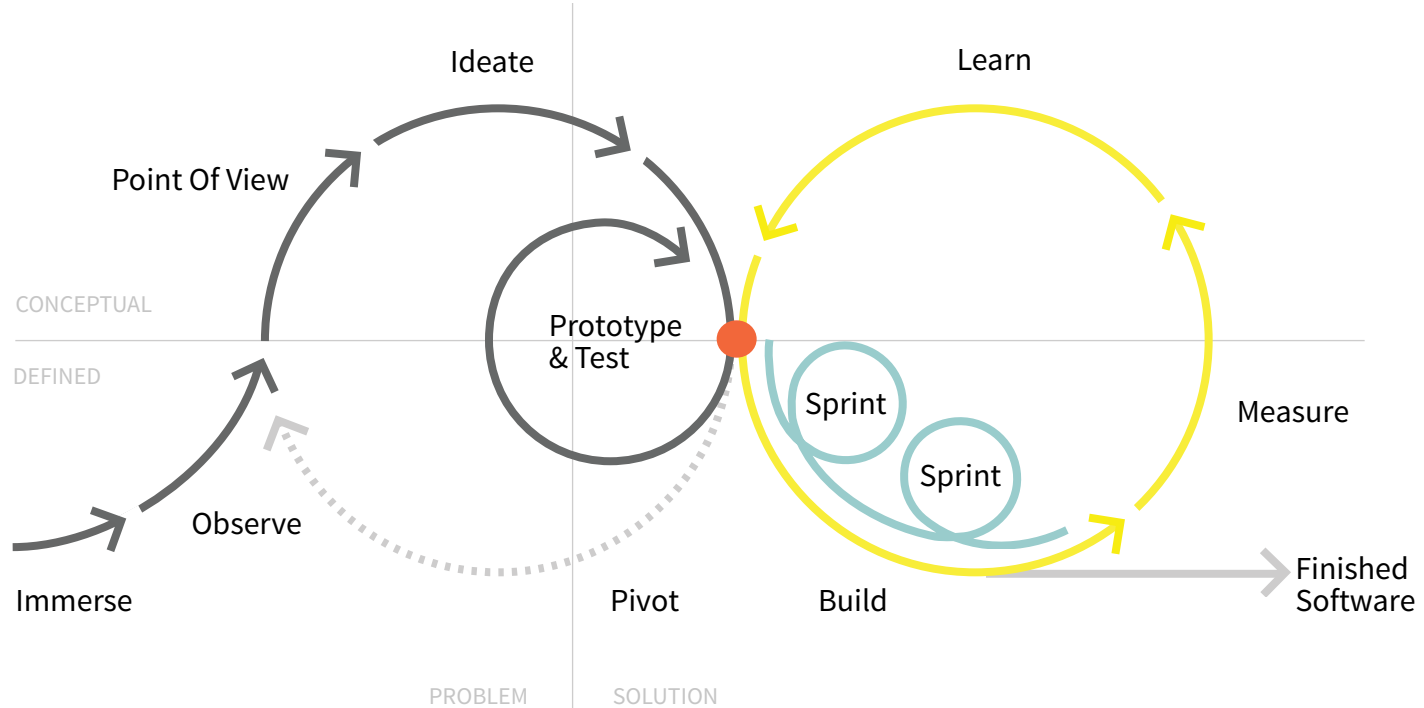

Lean: Is there a market for what we're building?

Design Process: Are we building the right thing?

Better Together
